TEAMMSS

Toolkit for Encouraging Additive Manufacturing in Middle School

“One of the main factors that contribute to a student’s choice of pursuing STEM pathways is having a dynamic experience that was fun and engaging! That is why TEAMMSS was created...”

Through Problem Based Learning students deploy the engineering and design process to help our friend “Avi”.

BEGIN YOUR ADVANCED MANUFACTURING JOURNEY TODAY!

Learn more about careers in additive manufacturing and the world of advanced manufacturing at AmericaMakes.us/EWD

America Makes

Education and Workforce Development

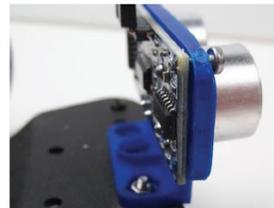

Driven by...

Teacher and counselor training on advanced/additive manufacturing pathways and deployment of the TEAMMSS Program

Our student designers and engineers create, build, and print Avi's brackets and fixtures to hold his sensors so that they can then program him to achieve all kinds of missions!

Reach out and get involved!
