

Welcome to America Makes.

Becoming a Member

We are delighted you are interested in joining America Makes and our exciting work to further additive manufacturing innovation.

Convene • Coordinate • Catalyze

The mission of America Makes is to foster a balanced community of diverse organizations with pooled resources to ultimately increase U.S. competitiveness in the global manufacturing market. We strongly believe in the promise additive technology offers to accomplish this goal. However, no single company, university or government agency can achieve this alone.

The entire America Makes team looks forward to collaborating with you and serving your organization. Should you choose to join, we hope you take full advantage of your membership—we encourage you to engage with the network of members, attend our events, participate in project calls, and allow us to connect you with other members to help you develop meaningful relationships across the entire additive manufacturing value chain.

Through collaboration, we all achieve more!

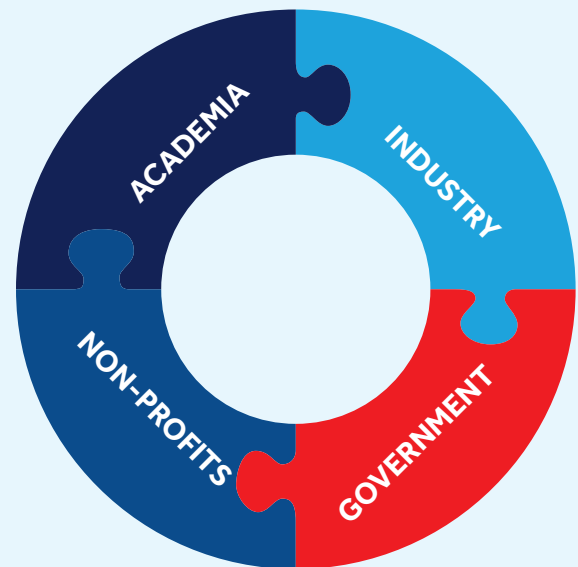

Who is America Makes?

America Makes is a public/private partnership with substantial federal, private industry, and academic investment.

The partnership is a multi-agency collaboration among industry, government and universities, led by the Department of Defense Manufacturing Technology Program.

America Makes is based in Youngstown, Ohio, and is managed and operated by the National Center for Defense Manufacturing and Machining (NCDMM).

Our community is made up of nearly 250 members with organizations representing small and large industry, academia, non-profits, and government. We are all working together to accelerate the adoption of additive manufacturing in the U.S.

When America Makes America Works

America Makes is part of

Membership Benefits

All Members

- Access to our library of additive manufacturing resources
- Leverage opportunities to research funding and cost-sharing
- Access to comprehensive additive knowledge-base

Small & Medium Enterprises

- Network with high-level decision makers from large industry
- Help navigating complex government customer market
- Access to IP adoption insight and market readiness mentoring

Large Industry

- Gain insight into cutting edge of industry innovation
