

MEMBERSHIP ELIGIBILITY

PROJECT CALL Q&A

The following questions are often asked regarding new membership participation in project calls.

Q: What payment options are available for my company to initiate an active membership by the posted deadline?

A: *Cash, @Program cost share, or a combination of both. To be paid in full by the stated project call deadline(s).*

Q: Can my organization initiate a new membership using cost share committed in the project budget of the proposal?

A: *No, membership must be paid in full. This is because membership will become active before the project award is made and will remain active for one year. An active membership does not guarantee a project award; therefore, it is required that only cost share under the @Program is used to initiate a new membership. Please note, if the project is awarded the cost share committed in the budget will become eligible to be applied towards the membership account balance.*

Q: What limitations do non-members encounter when participating as a project team member?

A: *It is strongly recommended that each project team member become an active America Makes member, however, this is not a requirement for all projects. In the event non-member(s) participate on an active project, they will have limited access to the project work and the findings thereof. Non-members will be denied access to project team meetings, project generated information, data, and presentations not cleared for public dissemination.*
